BDM REBUILD MISSOURI WEEK

The disaster

In December 2015, Winter Storm Goliath brought severe weather and tornadoes to a large part of the Plains, Midwest and Northeast. The unprecedented event caused by a dangerous combination of heavy rain, snow and river flooding set historic water level records across the state of Missouri. In St. Louis alone, the river crested at 42.58 feet – just shy of the record.

Because this disaster occurred the day before Christmas Eve, it received very little attention, despite the fact that 33 counties received a declaration for Individual Assistance and over 2,400 individuals and families applied for grants from FEMA.

What you can do about it

Brethren Disaster Ministries (BDM) is working with Eureka Disaster Relief Committee to help families affected by this flooding rebuild their homes. BDM has identified a week for volunteers to join in this recovery and is welcoming people from all districts.

Join us the week of April 30-May 6!

Scope of work (exact work to be determined on site)

- Repairs to basements, kitchens, bathrooms & roofs
- Replacing & finishing sheetrock
- Painting
